1. Introduction

Visroment is a new and upcoming company founded by Sivakele Molapo in 2025 in order to establish a lifestyle clothing brand with the spirit of personal growth, self-expression, and resilience. The brand's intention is to target individuals wanting to continuously strive for excellence. My aim is to establish a solid web presence for this and this proposal stipulates the development of a professional website that is in line with Visroment's branding and marketing goals.

2. Current Analysis

Currently Visroment has no online platform. The brand's reach is limited to:

- In-person interactions
- Word of mouth
- Informal social media followers

Without a website Visroment, has no place for potential customers to learn more about the brand. The absence of a digital storefront prevents important analytics from being collected as well, other fashion businesses like Visroment are already using e-commerce.

3. Target Audience

The target audience consists of individuals who:

- Embrace a "hustle" mentality
- Find inspiration in stories of overcoming adversity.

These individuals seek high quality fashion that reflects their identity and ambition. The website will serve as a central hub for showcasing Visroment's apparel, sharing brand stories and facilitating seamless online purchases.

4. Website Goals and Technical Features

The main objectives of the website are to increase brand awareness, driving online sales, and improving customer engagement. By implementing an SEO-optimized, mobile-friendly design,

the website will enhance visibility and accessibility for a broader audience. Customers will be able to enquire and or buy products on this website.

5. Design Aesthetic

The website will feature essential pages such as:

- **Home page:** Highlighting the brands mission, latest collection, and key campaign messages.
- **About page:** Providing insight into Visroment's journey, values and creative direction.
- **Product Catalogue:** Displaying available apparel with detailed descriptions and high-quality images.
- **Contact Page:** Including business details and an inquiry form to enhance customer communication
- **Enquiry Page:** This page will be dedicated to any enquiries other brands may have about possible collaboration opportunities
- **Cart page:** This will show a summary of the products a client wishes to purchase and the total amount of money they would need to purchase.
- **Payment page:** Where a customer will be able to pay the amount needed to make the purchase

To ensure consistency with Visroment's branding, the website will incorporate a colour scheme of;

- #FE5E00 - Orange
- #03346F – Navy Blue
- #FFFFFF - White
- #1D1D1D – A faint Black
- #EDF0F4 – Faint Grey

Along with a clean and bold as well as modern typography that embodies the brand's motivational tone.

6. Functionality Proposed

A website for Visroment will be made simple and navigable for customers to have an easy time while browsing and shopping. They will be able to explore the site using an adaptable navigation

menu, go through products by category, see detailed descriptions with clear imagery for products, zoom in on a product, the website will also contain an interactive contact form. Although the first version will not include payment processing, the website will be built modularly for the future addition of other functions such as shopping cart systems and online payments using trusted payment gateways such as PayFast or Yoco, for secure eCommerce operations. Some basic SEO tools such as meta tags, alt text, and sitemap generation will be provided. The contact form will be linked to the business email for easy lead capturing and follow-ups.

7. Development Plan and Wireframing

HTML & CSS will be used for structure and styling

Javascript Will be used for interactive elements like dropdown menus, image sliders, form validation

SEO best practices to improve search engine ranking and drive organic traffic

Hosting & Domain Setup using an affordable and scalable solution

Bootstrap will be used with CSS in order to make the website mobile responsive

NB: A low-fidelity wireframe for each page will be provided by me, attached to this document. A structured plan will be followed, beginning with planning and research, followed by wireframing, design, development then testing. The low fidelity will be created using Figma so that you can envision the layout and User Experience of the website.

I have also used

8. Website Structure and Sitemap

To create a smooth and easy-to-navigate user experience, we've put together a detailed sitemap using **Microsoft Visio**. This sitemap lays out the structure of the Visroment website, emphasizing the main and sub-navigation levels, arranging the pages, and pinpointing essential user interaction areas, like call-to-action buttons and product flows. Essentially, the sitemap acts like a blueprint for both the design and development phases, making sure all important content and user paths are included in the final build. For your convenience, we've attached a PDF version of the sitemap to this proposal so you can see the planned layout visually.

9. Budget

Domain Registration	R195 (Once-off then R99 annually)
Hosting on AfriHost	R99 (Monthly)
Website Development	R1000 (One-time)
SEO Optimization	R1000
Maintenance & Updates	R120 (Monthly)

10. Timeline

The project timeline is set for five weeks, covering planning, design, development, testing and launch.

I will make use of a Trello board in order to keep track of the timeline I have set which you may also have access to in order to keep track of the website.

Link to Trello board: [VISROMENT | Trello](#)

A summary below:

Week 1	Planning and Research
Week 2	Wireframing
Week 3	User Interface Design
Week 4	Website Development
Week 5	Testing & launch

11. Next Steps

A website is essential for Visroment to establish credibility, reach a wider audience, and enhance customer engagement. By integrating storytelling and visually compelling elements inspired by cultural references such as John Wick and 50 Cent, the website will align with Visroment's bold and motivational brand identity. The implementation of strategic marketing and eCommerce features will position Visroment for long-term growth in the competitive fashion industry.

From you I only ask for the images of the clothes that you are selling, the logo, the brand kit/identity documents and I will handle everything from there.
